## Summary

Results-driven Software Developer with over 2 years of experience specializing in designing and deploying dynamic web applications. Expertise spans both front-end and back-end development, adept at crafting intuitive user interfaces and scalable code solutions. Proven track record in optimizing performance, collaborating seamlessly across teams, and implementing industry best practices. Dedicated to staying current with evolving technologies and continuously enhancing skills to deliver robust software solutions.

## Experience

### Web Developer

March 2023 – Present

#### On Direct Marketing Services LLP, Pune

- Developed and maintained animated landing pages for enhanced user engagement.
  - Designed and implemented dynamic survey forms for data collection.
  - Created an email validator tool to ensure email accuracy.
  - Developed and managed an admin panel for streamlined tasks.
  - Optimized website performance through best practices and regular testing.
- Project : Booking Tool**
- Technologies Used: React.js, Node.js, Mysql (PhpMyadmin)
  - Description: Developed a comprehensive booking tool designed to streamline the scheduling of meetings. This tool ensures flexibility for users while providing robust administrative controls.
  - Key Features:
    - Meeting Booking: Users can book meetings seamlessly using an intuitive interface.
    - Conflict Resolution: If multiple users attempt to schedule meetings at the same time, they can send requests to each other to resolve conflicts.
    - Admin Controls: Administrators have the ability to add and delete users, ensuring efficient management of user accounts.
    - Forced Rescheduling: Admins can also forcefully reschedule meetings to accommodate changes and avoid conflicts.
    - API Integration: Utilized Axios for efficient API calls to a Node.js backend, ensuring smooth data transactions and real-time updates.

### Web Developer

#### SRV Media Pvt.Ltd, Pune

Feb 2022 - Nov 2022

- Executed CRUD operations for efficient data management.
- Integrated Google Captcha for enhanced form security.
- Configured SMTP for reliable email sending.
- Developed responsive web pages using Bootstrap.
- Implemented form validation for data integrity.
- Improved website SEO with on-page techniques.
- Assisted in migrating legacy systems to modern technologies.
- Participated in daily stand-ups and sprint planning.
- Maintained documentation for features and updates

## Personal Project

### E-Commerce Website

- Technologies Used: React.js, Node.js, MongoDB
- Description: Developed a fully functional e-commerce website to provide seamless service to customers and enable providers to easily add new products.
- Key Features:
  - Implemented CRUD operations using Node.js.
  - Utilized MongoDB for efficient data storage and retrieval.
  - Enhanced user experience with libraries like overlay-navbar, react-alert, and react-rating-stars.

### Online Parking Management System

- Technologies Used: Laravel (PHP framework), PostgreSQL, HTML, CSS, JavaScript
- Description: Developed an online parking management system using Laravel to simplify parking management and provide real-time updates on parking availability.
- Key Features:
  - Facilitated easier parking space reservation for customers.
  - Provided real-time status updates on parking spaces.
  - Included essential details to assist customers in finding available parking spots.
